

Office365 & Microsoft Cloud

Benefits Guide

What is Office365 for Education?

Office 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like PowerPoint, OneNote, Excel and Outlook with powerful cloud services like OneDrive and Sway, Office 365 lets anyone create and share anywhere on any device.

Leading Schools are moving ahead with Office365. Free your school from the burden of managing email and files. The education cloud enables anytime anywhere access for your staff and students to full featured documents, calendars, and email on every device.

Why Office365? It's free for education! With cloud services, your school can drastically lower your support costs and provide a higher level of service for your teachers and students. And with EDU365 as your partner we can help integrate it with your current school systems.

Why EDU365? When your school chooses to partner with EDU365 you get a partner that is focussed on EDUCATION. We understand how to make Office365 work for your teachers, staff, students...and your budget!

EDU365 have already completed many large migration projects in the region and have integrated Office365 with schools' management information systems to automate many of the manual network admin processes that are required to manage users at a school. We've even been recognised by Microsoft as experts in the field!

EDU365 provide unparalleled Office365 migration assistance, integration services and support and are always there to make sure your school is successful.

Whether you are choosing to just migrate to a hosted Exchange email or integrate all the Office365 products into your school, EDU365 has the expertise and knowledge to make the process quick and easy for you.

Why Microsoft Cloud?

What is the Cloud? Simply put, cloud computing is the delivery of computing services—servers, storage, databases, networking, software, analytics, intelligence and more—over the Internet (“the cloud”) to offer faster innovation, flexible resources, and economies of scale. You typically pay only for cloud services you use, helping lower your operating costs, run your infrastructure more efficiently, and scale as your needs change.

Why Microsoft Cloud? The Microsoft Cloud, also known as ‘Azure’ is an ever-expanding set of cloud services to help your organisation meet your challenges. It’s the freedom to build, manage, and deploy applications on a massive, global network using your favorite tools and frameworks.

Is Azure Secure? Yes, security and privacy are built into the Azure platform. Microsoft is committed to the highest levels of trust, transparency, standards conformance, and regulatory compliance with the most comprehensive set of compliance offerings of any cloud service provider.

How does Azure compare to other clouds? Azure is the only consistent hybrid cloud, has more regions than any cloud provider, delivers unparalleled developer productivity, and offers more comprehensive compliance coverage—including meeting the requirements of the General Data Protection Regulation (GDPR)..
